PetroPlus® valves, actuators, instrumentation, flow computers, automation parts, chart recorders, differential pressure units, flow meters, indicators, switches, transmitters & turbine meters

Relentless *dedication* to surpassing expectations

We strive to deliver seamless and efficient refinery equipment solutions, ensuring every aspect of the refining process operates with precision and excellence. Our team values integrity, innovation, and continuous improvement, allowing us to optimize operations and enhance performance across the board. We believe in fostering long-term partnerships built on trust, transparency, and a shared commitment to quality.

At the core of our operations is a relentless focus on safety and sustainability, ensuring we meet the highest industry standards while focussing on continuous improvement. By leveraging cutting-edge technology and a dedicated workforce, PetroPlus® ensures their clients to stay at the forefront of the oil and gas industry, delivering reliable, cost-effective solutions with a global reach. We are proud to be a trusted partner in driving sustainable growth and operational excellence.

Excellence in supplying refinery equipment

PetroPlus® is a distinguished provider of refinery equipment in the oil and gas industry, recognized for delivering perfection in supply chain solutions. We are the premier supplier of equipment such as valves, flow meters, actuators, chart recorders, and other essential instrumentation. PetroPlus® excels in a streamlined procurement process.

With an unwavering focus on client satisfaction, we ensure that every component is delivered promptly and supported by expert guidance. Our holistic approach to supply chain management includes sourcing, logistics, and technical support, ensuring clients can focus on their core operations without disruption. In a world where perfection is the standard, PetroPlus® redefines what it means to excel in the oil and gas industry.

Navigating the *energy* transition

At PetroPlus®, sustainability is at the core of our operations and critical to our long-term success as a leading global energy and chemicals company. We understand that sustainable practices are not only necessary for the planet but also essential for maintaining our competitive edge in an evolving industry. Our commitment to sustainability influences how we address environmental and societal challenges, helping us shape a future where energy is responsibly produced and consumed. As we adapt to the shifting global landscape, we remain dedicated to driving innovation that balances economic growth with environmental stewardship. As the world transitions toward a lower-carbon economy, PetroPlus® is embracing this challenge head-on by aligning our strategy with global efforts to combat climate change.

We recognize the urgency of reducing carbon emissions and are committed to doing our part in the energy transition. Through leveraging our strong operational expertise and diverse business portfolio, we aim to accelerate the adoption of clean energy solutions. Our goal is to reach net-zero Scope 1 and Scope 2 greenhouse gas emissions across our wholly owned and operated assets by 2050. This target supports the global movement toward a sustainable future while helping achieve the Kingdom of Saudi Arabia's national vision to reach net-zero emissions by 2060.

PetroPlus® and the *Climate* Challenge

At PetroPlus®, we believe that being an oil and gas company doesn't mean we can't make a positive impact on the climate challenge. While it may seem counterintuitive to some, we see it as an opportunity to leverage our expertise and resources to help address global climate issues. As a world-leading energy company, we are uniquely positioned to contribute meaningfully to a sustainable future by using our knowledge, technology, and influence to drive change. We are committed to supporting efforts that ensure energy production and environmental responsibility can go hand-in-hand. PetroPlus® is fully aligned with the goals of the Paris Agreement to limit global temperature rise to well below 2°C above pre-industrial levels. We recognize that reducing emissions and meeting the growing energy demands of the world are two of the most pressing challenges of our time.

PetroPlus® is dedicated to playing a central role in tackling these challenges by advancing low-carbon energy solutions and striving to minimize our environmental footprint. By balancing the need for energy access with a commitment to sustainability, we can drive a cleaner, more responsible energy future. In line with our commitment to combating climate change, PetroPlus® has set a bold ambition to achieve net-zero Scope 1 and Scope 2 greenhouse gas emissions across all of our wholly owned and operated assets by 2050. This commitment reflects our determination to meet the climate challenge while ensuring that we continue to provide the energy needed for economic growth and development. We will continue to innovate and invest in technologies that reduce emissions and increase energy efficiency, helping us and the world meet our shared sustainability goals.

Perfection is not *attainable*,
but if we chase *perfection*
we can catch *excellence*.

An oil pumpjack is silhouetted against a warm sunset sky. The entire image is overlaid with a semi-transparent digital grid and data lines, suggesting a connection between traditional oil extraction and modern technology.

Assessing and managing sustainability risks

At PetroPlus® we are dedicated to fostering a safe, healthy, and sustainable workplace, alongside upholding fair labour practices throughout our supply chain. Our responsibility to conduct business ethically extends beyond our own employees to the suppliers and partners we collaborate with. We carefully select partners who share our commitment to sustainability and ethical practices, recognizing that strong, responsible relationships are key to the long-term success and resilience of our supply chain. Our dedication to sustainability drives our approach to both our operations and our partnerships, ensuring positive outcomes for all stakeholders. PetroPlus® holds all of our suppliers and business partners to the highest ethical standards, requiring them to adhere to our Supplier Code of Conduct. This code sets out strict guidelines on human and labour rights, occupational health and safety, environmental responsibility, climate impact, and ethical business practices. It is essential that our partners align with these values, as we believe that maintaining ethical supply chain is vital to meeting our sustainability goals.

To monitor compliance, PetroPlus® has implemented a robust system for screening and evaluating potential business partners, ensuring they meet our rigorous standards for responsible business practices. Understanding and managing sustainability risks in our supply chain is a key priority for PetroPlus®. We use a comprehensive country risk assessment methodology to evaluate the sustainability challenges in the regions where we operate. This tool, developed by industry leaders, helps us identify areas with heightened sustainability risks, such as human rights concerns, labour practices, environmental impacts, and political instability. Based on these assessments, PetroPlus® maintains an up-to-date risk categorization, which guides our decision-making. Our assessments also identify regions where operations may be restricted due to concerns like trade sanctions, conflicts, and other critical risks, enabling us to prioritize responsible sourcing and mitigate potential impacts.

Supporting *causes* that matter

PetroPlus® is not merely a part of our business; it is a fundamental value and a foundation on which various pillars of corporate identity have been stood. It ceases the way we think, how things are done, and installs pride into all employees and creates a culture of generosity, service, and excellence. Thoughtfulness, humility, and creativity are the beliefs guiding the company and empowering its human resources to do great services, making their professional lives successful and most importantly meaningful for the community. The same goes in each and every operation that we have as a company in the attitudes of our employees. These are among the causes PetroPlus® actively invests its will in and, among them, are especially concerned PetroPlus®. Cause-related, other than encouraging employees and mobilizing their community service activities, it has arguably been the best driver of social responsibility in the company. Charity of significant personal meaning to them is made accessible and encouraged for employees.

This in itself makes a positive contribution to PetroPlus®'s commitment to change. Giving is important for PetroPlus®, and we pride ourselves on being part of both above-the-line and grassroots initiatives for our employees. PetroPlus® was set up in 2010, founded by the co-founders of the company, to help communities stand back on their feet in dire need, especially those in Sri Lanka since the co-founders hail from there. It was officially renamed in the year 2022 to reflect the growth and continual commitment of PetroPlus® towards the mission with the charity. PetroPlus® being the chief donor gives substantial funds to the foundation, also by raising funds through various fundraising activities. PetroPlus® continues to drive initiatives that inspire staff involvement in charitable endeavors, including project suggestions, fundraising events, and sporting challenges.

Effective management of *health and safety*

At PetroPlus®, the effective management of health and safety, the environment, human rights, and community engagement (collectively referred to as "HSEC") is fundamental to our mission of sustainable and responsible business growth. We place the utmost priority on safeguarding the health, well-being, human rights, and safety of our employees, customers, and the communities we serve. Similarly, we are committed to protecting and respecting the environment in all regions where we operate. In 2022, PetroPlus® achieved its health and safety objectives while making substantial progress in reducing the frequency and severity of process safety incidents. Every incident is thoroughly investigated, with lessons learned shared across all operational units to promote a culture of continuous improvement and accountability. PetroPlus® recognizes that many of the products we trade, particularly fuels, are highly flammable and may present additional risks, such as the carcinogenic properties of certain naphtha products.

To ensure the safe handling of these materials, PetroPlus® communicates hazard information, precautionary measures, and risk management guidelines to clients through Safety Data Sheets (SDS). These SDS documents comply with globally harmonized standards established by the United Nations and adhere to regional regulations such as REACH in Europe and the Hazard Communication Standard in the United States. In jurisdictions like the European Union, products are marketed only after comprehensive registration dossiers are submitted, including data on human health and environmental hazards. Our extensive SDS library supports compliance and safety in multiple regions, while our REACH registrations enable the responsible manufacturing or importation of petroleum substances and biofuels. Through training, procedures, and audits, PetroPlus® ensures regulatory compliance and, as of now, has reported no incidents related to product safety management.

An aerial photograph of an offshore oil platform and a ship deck. The platform on the left features a large octagonal helipad with a white 'H' and arrows. The ship deck on the right is a long, narrow structure with various equipment. The background is a deep blue sea with white-capped waves.
